**Our Mission...**

To be the first choice supplier for our customer's millwork and finish products needs.

Our skilled employees, each with a desire to excel, will provide quality products at competitive prices and deliver superior service to build lasting relationships with customers and vendors.
BASE MOULDING PROFILES

BASE MOULD: Applied where floor and walls meet, forming a visual foundation. Protects walls from kicks, bumps, furniture, etc. Base may be referred to as One, Two, or Three-Member. Base Shoe and Base Cap are used to conceal uneven floor and wall junctions.

Note: Actual Profile Sizes May Vary Depending On Wood Species

CHAIR RAIL PROFILES

CHAIR RAILS

CHAIR RAIL: Interior moulding applied about one third up from the floor, paralleling base moulding and encircling the room. Originally used to prevent chairs from marring walls. Used today as a key decorative detail in traditional and colonial design.

DOOR STOP PROFILES

DOOR STOPS

DOOR STOPS: In door trim, stop is nailed to the faces of the door frame to prevent the door from swinging through. As window trim, stop holds the bottom sash of a double-hung window in place. Also used as an apron under window stools.

<td>11/16 x 11/16</td>
<td>FJ SP</td>
</tr>
<tr>
<td></td>
<td>3/4 x 3/4</td>
<td>O</td>
</tr>
</tbody>
</table>

CORNER GUARDS: Outside (OS) corner guard is used to protect corners or to cover ragged edge where wall covering and painted surfaces meet at outside corner.

HALF ROUND

<table>
<thead>
<tr>
<th>Profile</th>
<th>Thickness</th>
<th>Species</th>
</tr>
</thead>
<tbody>
<tr>
<td>TM 120</td>
<td>1/2 x 1</td>
<td>SP O</td>
</tr>
</tbody>
</table>

Used as a screen moulding, bead shelf edge or panel moulding.

FULL ROUND

<table>
<thead>
<tr>
<th>Profile</th>
<th>Thickness</th>
<th>Species</th>
</tr>
</thead>
<tbody>
<tr>
<td>TM 233</td>
<td>1-1/4</td>
<td>H</td>
</tr>
</tbody>
</table>

Rounds: Most often used as a closet pole or room divider.

Note: Actual Profile Sizes May Vary Depending On Wood Species:
- FJ = Finger Joint
- FJP = Finger Joint Primed
- H = Hemlock
- SP = Solid Pine
- KP = Knotty Pine
- O = Oak
- OV = Oak Veneer
- P = Poplar
- HK = Hickory
- MDF = Medium Density Fiberboard
- MDF-UL = MDF Ultralite
- KA = Knotty Alder
- CA = Clear Alder
- SA = Superior Alder
- M = Maple
- CH = Cherry

15 TRIMCO MILLWORK
MISCELLANEOUS MOULDING PROFILES

CORNER MOULD
Universal Corner Mould used for radius corners.

PANEL CAP
Panel/Ply Cap: Turns out the upper edge or top of a wainscot. Covers plywood’s rough sandwich edge in installations where it is exposed to view. Also called a Dado Cap.

WAINSCOT

Note: Actual Profile Sizes May Vary Depending On Wood Species
- FJ = Finger Joint • FJP = Finger Joint Primed • H = Hemlock • SP = Solid Pine • KP = Knotty Pine • O = Oak • OV = Oak Veneer • P = Poplar • HK = Hickory
- MDF = Medium Density Fiberboard • MDF-UL = MDF Ultralite • KA = Knotty Alder • CA = Clear Alder • SA = Superior Alder • M = Maple • CH = Cherry
FLEXIBLE MOULDING

TRUE RADIUS MATERIAL LENGTH CHART

DIAMETER - WIDTH  FLEX TO FIT

RADIUS LENGTH CONVERSION TABLE

OUR STANDARD DIAMETER LENGTHS
- 2/4 DIAMETER = 5.166 LINEAL FOOT
- 3/0 DIAMETER = 6.333 LINEAL FOOT
- 4/0 DIAMETER = 7.916 LINEAL FOOT
- 5/0 DIAMETER = 9.500 LINEAL FOOT
- 6/0 DIAMETER = 11.000 LINEAL FOOT

OUR CUSTOM DIAMETER LENGTHS
- 1/6 DIAMETER = 4.000 LINEAL FOOT
- 2/0 DIAMETER = 4.750 LINEAL FOOT
- 2/6 DIAMETER = 5.583 LINEAL FOOT
- 2/8 DIAMETER = 6.000 LINEAL FOOT
- 3/4 DIAMETER = 6.833 LINEAL FOOT
- 3/6 DIAMETER = 7.333 LINEAL FOOT
- 4/4 DIAMETER = 8.333 LINEAL FOOT
- 4/6 DIAMETER = 8.833 LINEAL FOOT

FLEXIBILITY NOTES

A 2/4 diameter will expand to 2/6 or contract to 2/0
A 3/0 diameter will expand to 3/6 or contract to 2/6
A 4/0 diameter will expand to 4/6 or contract to 3/6
A 5/0 diameter will expand to 5/6 or contract to 4/6
A 6/0 diameter will expand to 6/6 or contract to 5/0

Flexible expansion and contraction may vary when molding width is over 3 1/2 inches.
TRIM-FIT MDF CROWN CORNERS

EASY INSTALLATION
Measure wall from corner to corner and subtract the appropriate crown dimension listed below from measurement:

<table>
<thead>
<tr>
<th>Trim-Fit #</th>

<td>6-5/16&quot;</td>
<td>5&quot;</td>
<td>5/8&quot;</td>
</tr>
</tbody>
</table>

CUTBACK FOR EACH

TRIM-FIT™ Crowns are manufactured to fit the following TRIMCO profiles:

TM 45 5/8 x 5-1/4
TM 48 5/8 x 4-1/4
TM 49 5/8 x 3-5/8
TM 329 1-1/16 x 6-5/16

Note: Actual Profile Sizes May Vary Depending On Wood Species

HIGH PERFORMANCE COMES IN MANY SIZES AND SHAPES.

People are happiest when all the dots are connected. That’s why the Millwork Wall Finishing System includes more than 23 elements in all:

- 20 contoured wall base profiles
- 3 chair rail profiles
- A corner guard
- Self-stick quarter round and shoe moulding.

It’s a system that can eliminate concerns of mismatched wood or variations in color. Johnsonite carefully coordinates profile designs and guarantees color consistency from one batch to another, from one year to the next.

MILLWORK CHAIR RAIL

All Millwork profiles in wall base, chair rails and corner guard are available in standard 8’ lengths.

GRADE Wood mouldings are available in two grades. "N Grade" is intended for natural or clear finishes and the exposed face must be of one single piece. "P Grade" is intended for opaque paint finishes or overlays and can be finger jointed and or edge glued.

These grades may have a few minor characteristics such as light checks, small pitch pockets, light torn grain, occasional medium stain or a small amount of medium pitch. A serious combination of these is not admissible in any one piece. The number and extent of characteristics permitted varies as the area of the piece increases or diminishes.

N-GRADE (suitable for natural, stain, paint, or enamel finish). On the basis of net 2" face–12' long this grade will admit the following characteristics or their equivalent:

A. A small spot of torn grain, one foot of medium pitch, light skip in dressing on back, or B. One small and one very small pitch pocket, or C. One short, tight season check and a light snipe at one end, or D. Medium stain in occasional (10%) pieces for one third the area in an otherwise perfect piece.

Characteristics that will not show when piece is laid shall not be given the same consideration as characteristics elsewhere.

P–GRADE (paint or overlay grade) The same quality as N-Grade except stain is no defect. Glue joints (laminated or finger joints) must be precision machined and assembled with tight joints. Patching, filling or plugging is permitted providing a paintable surface results.

LENGTHS Random lengths shall be 3 to 20 feet in multiples of one foot. Not over 15% of any one item shall be under 8 feet. When computing the percentage of shorts in casing and stops, pieces 7' in length will be considered long lengths.

Specified lengths of cut to length window and door trim shall be graded as completely usable.

Finger and/or laminated jointed mouldings may be ordered in specified lengths with not over 15% trim backs permitted in any one item.

Specified Lengths We reserve the option to charge a 25% premium on specified lengths of items normally sold on a random length basis. This policy applies mostly to Solid Pine, Oak and Hemlock mouldings.

ADHESIVES Adhesives used in finger joints or laminations shall meet the dry used adhesive performance requirements of ASTM D-3110-82 (or latest revision) "Standard Specification for Adhesives Used in Non-Structural Glued Lumber Products."

In situations where a Wet-Use adhesive is required, it shall be so specified, acknowledged and invoiced.

BUNDLING shall be in accordance with the Standard Wood Moulding and Millwork Producers Association Schedule.

MANUFACTURING TOLERANCES Thickness and width + or - 1/32".

DEFINITIONS Definitions of characteristics permitted in wood mouldings shall be those of the National Grading Rules for softwood lumber.

Settlement Provisions In determining compliance with purchase specifications and of effecting settlement of invoices between buyers and sellers, each item of a shipment shall be considered as of the grade invoiced if upon re-inspection 95% thereof or more is found to be of said grade or better.
Green’s the Thing

At Trimco Millwork, we’re not just trying to conserve energy and reduce our own carbon footprint, we’re taking green to the next level by offering the finest, environmentally responsible building materials available. We offer a wide range of products that are made from recycled materials or are recycleable, as well as products from manufacturers that support the green initiatives of the organizations you see on this page. We are constantly searching for and adding high quality, green products to our inventory.

Go Green

To make it easier for our customers to find greener building materials we have developed GO GREEN, a selection of products that are easier on the earth through their manufacture, performance or use. Our GO GREEN offerings can help you meet your green product requirements.

Building Green With Trimco

The products listed below are a sample of the Go Green products we offer at Trimco Millwork:

MOULDING
- Pac-Fit / Can Trim - MDF
- Red Cloud - Knotty Alder
- Ferche - Oak
- Sierra Pacific - Frames
- Brightwood - Hemlock & Solid Pine
- Arauco - Finger Joint

DOORS
- Therma Tru - Doors
- Lynden Doors - Interior Doors
- ODL - Door Lites
- Rouge Valley - Doors

SIMPSON STRONG TIE

TYPAR

FIBERON - DECKING

KROSSWOOD
