We reserve the option to charge a 25% premium on 12' and longer tally normally sold on a random length basis. This policy applies mostly to Solid Pine, Oak and Hemlock mouldings.
We reserve the option to charge a 25% premium on 12' and longer tally normally sold on a random length basis. This policy applies mostly to Solid Pine, Oak and Hemlock mouldings.
Chair Rail

Chair Rail: Interior moulding applied about one third up from the floor, paralleling base moulding and encircling the room. Originally used to prevent chairs from marring walls. Used today as a key decorative detail in traditional and colonial design.

Stops

Stops: In door trim, Stop is nailed to the faces of the door frame to prevent the door from swinging through. As window trim, Stop holds the bottom sash of a double-hung window in place. Also used as an apron under window stools.

Chamfer Strip

Chamfer Strip: Used in highway and dam construction forms, making a chamfered edge at concrete corners. Also used where kitchen cabinet tops meet the wall. Also used as a linoleum cove (under linoleum where it extends up the wall.)
We reserve the option to charge a 25% premium on 12' and longer tally normally sold on a random length basis. This policy applies mostly to Solid Pine, Oak and Hemlock mouldings.

8’ & RL

HANDRAIL

TM 231
1-1/2” x 1-11/16”
8’ - RL

TM 1867
2” x 1-3/4”
RL Only

TM 261DG
1-7/16” x 5-1/2”
RL Only

FULL ROUNDS:
Most often used as a closet pole or room divider.

HAND RAIL:
Used as a hand support in a stairwell.

We reserve the option to charge a 25% premium on 12’ and longer tally normally sold on a random length basis. This policy applies mostly to Solid Pine, Oak and Hemlock mouldings.
**Brick Mould**

**Used as an exterior door and window casing. A thick moulding provides a surface for brick or other siding to butt against.**

**TM 180**
- 1-1/4” x 2”
- RL, 7’ & 8’

**Base Shoe**

**Applied where base moulding meets floor. Protects base from damage. Conceals uneven lines or cracks where base meets floor.**

**TM 126**
- 1/2” x 3/4”
- RL Only

**Stop**

**In door trim, stop is nailed to the faces of the door frame to prevent the door from swinging through. As window trim, stop holds the bottom sash of a double-hung window in place. Also used as an apron under window stools.**

**TM 916**
- 3/8” x 1-3/8”
- RL & 7’

**TM 886**
- 3/8” x 1-3/8”
- RL & 7’

---

We reserve the option to charge a 25% premium on 12’ and longer tally normally sold on a random length basis.

This policy applies mostly to Solid Pine, Oak and Hemlock mouldings.
**Corner Blocks: Bullseye Design**

Available in Oak, Pine, MDF

* Sizes listed on price pages

**Plinth Blocks**

Available in Oak, Pine, MDF

**3/4" Radius Corners** • These are just a few of the profiles we stock. We can match any moulding profile in the above woods.

Available in Oak, Pine, MDF, and Alder

GRADE - Wood mouldings are available in two grades. "N Grade" is intended for natural or clear finishes and the exposed face must be of one single piece. "P Grade" is intended for opaque paint finishes or overlays and can be finger jointed and or edge glued.

These grades may have a few minor characteristics such as light checks, small pitch pockets, light torn grain, occasional medium stain or a small amount of medium pitch. A serious combination of these is not admissible in any one piece. The number and extent of characteristics permitted varies as the area of the piece increases or diminishes.

N-Grade (suitable for natural, stain, paint, or enamel finish). On the basis of net 2" face–12' long this grade will admit the following characteristics or their equivalent:

A. A small spot of torn grain, one foot of medium pitch, light skip in dressing on back, or
B. One small and one very small pitch pocket, or
C. One short, tight season check and a light snipe at one end, or
D. Medium stain in occasional (10%) pieces for one third the area in an otherwise perfect piece.

Characteristics that will not show when piece is laid shall not be given the same consideration as characteristics elsewhere.

P-Grade (paint or overlay grade)
The same quality as N-Grade except stain is no defect. Glue joints (laminated or finger joints) must be precision machined and assembled with tight joints. Patching, filling or plugging is permitted providing a paintable surface results.

LENGTHS
Random lengths shall be 3 to 20 feet in multiples of one foot. Not over 15% of any one item shall be under 8 feet. When computing the percentage of shorts in casing and stops, pieces 7' in length will be considered long lengths.

Specified lengths of cut to length window and door trim shall be graded as completely usable.

Finger and/or laminated jointed mouldings may be ordered in specified lengths with not over 15% trim backs permitted in any one item.

SPECIFIED LENGTHS
We reserve the option to charge a 25% premium on 12' or longer lengths of items normally sold on an 8'-16' random tally. This policy applies mostly to Solid Pine, Oak, Hemlock and Poplar mouldings (see moulding policies).

ADHESIVES
Adhesives used in finger joints or laminations shall meet the dry used adhesive performance requirements of ASTM D-3110-82 (or latest revision) "Standard Specification for Adhesives Used in Non-Structural Glued Lumber Products."

In situations where a Wet-Use adhesive is required, it shall be so specified, acknowledged and invoiced.

BUNDLING shall be in accordance with the Standard Wood Moulding and Millwork Producers Association Schedule.

MANUFACTURING TOLERANCES
Thickness and width + or - 1/32"

DEFINITIONS
Definitions of characteristics permitted in wood mouldings shall be those of the National Grading Rules for softwood lumber.

SETTLEMENT PROVISIONS
In determining compliance with purchase specifications and of effecting settlement of invoices between buyers and sellers, each item of a shipment shall be considered as of the grade invoiced if upon re-inspection 95% thereof or more is found to be of said grade or better.
Green's The Thing

At Trimco Millwork, we're not just trying to conserve energy and reduce our own carbon footprint, we're taking green to the next level by offering the finest, environmentally responsible building materials available. We offer a wide range of products that are made from recycled materials or are recyclable, as well as products from manufacturers that support the green initiatives of the organizations you see on this page. We are constantly searching for and adding high quality, green products to our inventory.

Go Green

To make it easier for our customers to find greener building materials we have developed Go Green, a selection of products that are easier on the earth through their manufacture, performance or use. Our Go Green offerings can help you meet your green product requirements.

Building Green With Trimco

The products listed below are a sample of the Go Green products we offer at Trimco Millwork:

MOULDING
ULTRALITE BOARDS
PAC-FIT / CAN TRIM - MDF
KNOTTY ALDER
FERCHE - OAK
SIERRA PACIFIC - FRAMES

DOORS
THERMA TRU - DOORS
